Notes:

Nutrient A & Nutrient B: Use with every feeding
Hygrozyme: Use with every feeding
Hygroben: Use once per week, recommended to be used within 24 hours of mixing
Hyclean: Use throughout entire grow cycle with every tank refill

Use this feed chart as a guide only. All Results dependent on external factors.
If the flower cycle is longer than 8 weeks, adjust the feed schedule according to weeks needed to complete the cycle.
To confirm rates for individual feedings or to determine how much product is needed for your reservoir, see feed calculator on www.Hygrozyme.com.
