Derived from: urea, monoammonium phosphate, potassium nitrate, magnesium sulfate, boric acid, iron EDTA, manganese EDTA, zinc EDTA, copper EDTA, ammonium molybdate

Potential Acidity: 923 lb. Calcium carbonate equivalent per ton.

Information regarding the contents and levels of metals in this product is available on the internet at: http://www.aapfco.org/metals.html

ATTENTION: The application of fertilizer material containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.

Foliar Feeding should be used as a supplement to your normal feeding program. It is not meant to be the only source of nutrition for your crops.

Apply 1-2 lbs per 100 gallons of water for greenhouse use. Every 10-14 days, apply .5lbs/100 gallons for continuous liquid feed programs.

Apply 3-5 lbs per acre as a foliar feed. Apply with as much water as possible for effective leaf coverage. Do not apply at concentrations greater than 1 lb of product in 5 gallons of water.

Early morning applications are recommended.

Limit of Solubility 6.5 lb per Gallon
