FUL-POWER

Hydrophobic Fulvic Acid

Ful-Power™ is BioAg's fulvic acid product; fulvic acids are derived from humic acids and are comprised of complex hydro-carbon chains. Due to their microscopic size and negative charge, they help nutrients pass through the plant cell wall more efficiently. In Carbon depleted and heavily salted soils, fulvic acids help to restore soil health and biology. They do this by returning essential carbon to the soil and binding to harmful salt molecules which helps them wash out from the soil.

BENEFITS

- Improves efficiency of applied fertilizers
- Effective tool at increasing tissue nutrient content
- Early applications show positive effect on cell elongation, cell division, and root development
- Improves overall plant health and decreases risk of abiotic stress
- Optimizes plant performance and improves soil conditions for improved crop establishment

APPLICATION RATES

Soil/ Soilless	10 - 30 mL/gal
Hydroponics	2 - 30 mL/gal
Compost Tea/ Foliar Sprays	10 - 30 mL/gal
Propagation	Soak 24 hrs at 35 mL/gal
Seed Activation	Soak 24 hrs at 35 mL/gal Soak vegetable seeds 72 hrs
Cuttings/ Clones	20 mL/gal, 2x per wk
Soil Fertility	16 fl. oz - 4 gal/acre
Foliar - General Fertilizer	16 fl. oz - 1 gal/acre
Foliar Tank Mixing	6.4 fl. oz - 16 fl.oz/ acre
Lawn & Garden	1/3 - 1 fl. oz/gal

Ful-Power™ can be applied to all crops including; trees, vines, ornamentals, small fruits, vegetables, row crops, feed crops, forage, and pasture. It can be applied by in-furrow, fertigation, and side dress. Consult with your agronomist for the correct number of applications.

OMRI LISTED®
For Organic Use

Faust Bio-Agricultural Services, Inc.
6080 Wigrich Rd
Independence, OR 97351
(503) 838-2467 | sales@bioag.com

Contains non-plant food ingredients:
Hydrophobic Fulvic Acid..... 1%

Form: liquid
Color: yellow/ golden
Odor: mild odor
Solubility: 100% soluble
pH: 3.5

Store in a cool, dry place.
