Micro™ 6-0-0

Base Family of Fertilizers & Nutrients

Micro™ 6-0-0 is designed for use in hydroponics, continuous feed, drain to waste, soilless, and traditional soil growing applications. For additional information, please see our website at www.CuttingEdgeSolutions.com

All CES products are blended and bottled in beautiful Northern California, using only the finest ingredients available. CES products are produced in strict compliance with our proprietary formula. CES prides itself in creating unique products that our customers can depend on.

Directions for Use:

Micro™ 6-0-0 is a highly concentrated solution. Never mix undiluted concentrates as this may result in nutrient lock-up. Add each nutrient separately to water and aerate reservoir regularly. Do not add additional Micro™ 6-0-0 to a prepared reservoir. Shake well and measure carefully using a milliliter measuring cup. Mix Micro™ 6-0-0 first into fresh water, stir well, then add other nutrients.

After nutrients are mixed in water, adjust pH to 4.5-6.5. Monitor ppm and EC in reservoir and top off with fresh water as needed. Empty and refill tanks every 1-2 weeks. Reservoir water temperature should be 60° F to 68° F. Do not store product in direct sunlight. Do not freeze.
