DOWN TO EARTH® ALL NATURAL FERTILIZERS

Cactus & Succulent is a blended fertilizer specially designed to support the keystone plants commonly found in arid climate gardens and water-wise xeriscapes. These fascinating specimens are adapted to withstand challenging environmental stresses and utilize diverse tactics to manage water storage efficiently. This robust blend of natural and organic ingredients will supply succulents of all types, including cactuses and agaves, with the nutritional backbone to keep them growing strong and producing beautiful blooms. At the same time, Cactus & Succulent fuels the growth of extensive root systems to maintain fabulous conservation focused gardens filled with striking cactuses and succulents.

GUARANTEED ANALYSIS

TOTAL NITROGEN (N)	2.0%	Derived from: Bone Meal, Basalt, Potassium Sulfate, Langbeinite, Alfalfa Meal, Feather Meal, Soy Protein Hydrolysate, Seaweed Meal
0.2% Water Soluble Nitrogen		
1.8% Water Insoluble Nitrogen		
AVAILABLE PHOSPHATE (P_2O_5)	4.0%	ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S):
SOLUBLE POTASH (K_2O)	8.0%	2.5% Humic Acids derived from Leonardite
CALCIUM (Ca)	5.0%	**Humic Acids may increase micronutrient uptake*
MAGNESIUM (Mg)	1.0%	Listed by the Organic Materials Review Institute (OMRI) for use in organic production.
1.0% Water Soluble Magnesium		F002174
SULFUR (S)	3.0%	
IRON (Fe)	1.0%	

APPLICATION RATES

Approximate Conversions: 1½ cups ≈ 1 lb ⅓ cup ≈ 4.6 oz 1 Tbsp ≈ 0.6 oz

Fertilize cactuses after winter dormancy has ended, early in the active growing period. Fertilize every 4-6 weeks after the first application throughout the growing period, but do not apply fertilizer during the dormant period.

Other succulents should be fertilized during their active growing period; this can occur at any time of year depending on the species. Fertilize every 4 weeks during the growing period.

Containers:
For new plantings, add ½-1 Tbsp per gallon of soil and mix thoroughly before planting.

For established plants, add 1 tsp fertilizer per quart of water and thoroughly drench soil. Repeat application every 4 weeks throughout the active growing period.

Landscape:
For new transplants, apply to the planting hole 1 Tbsp of fertilizer per gallon of soil in the original container. Mix and water well.

For established specimens, apply ¼ cup per 3 inches of diameter and scratch gently into soil. Water well.

USE OF A DUST MASK IS RECOMMENDED
