"Keep on growing!" – Jack

AZOMITE® is a mineral product found only in central Utah. This unique deposit was formed when an ancient volcano erupted, and its ash settled into a prehistoric seabed creating a complex mineral composition. AZOMITE provides essential minerals key to green growth and proper stem and fruit development. Granulated AZOMITE is virtually dust-free and spreads easily on fields, garden soils and lawns. Apply directly or in combination with composts, fertilizers, manures or soil amendments.
