FOHSE PRO Controller + 4 in 1 Sensor

ULTIMATE CONTROL AND MONITORING AT YOUR FINGERTIPS

Introducing the cutting-edge FOHSE PRO Controller, a game-changer in horticultural lighting management. Experience unparalleled command over your cultivation environment with various interface enhancements tailored to control our PRO Series fixtures seamlessly. With the PRO Controller, you're empowered to craft and preserve your personalized lighting presets, synchronizing them effortlessly with our 7-channel tunability settings.

We understand that the significance of data accumulation in crop management is essential to success. Thus, we present the all-new FOHSE 4-in-1 sensor. This innovative device enables precise monitoring of PPFD, temperature, humidity, and CO2 levels, providing invaluable insight for optimizing your growing conditions.

Never be disconnected from your crop again - our PRO Controller seamlessly integrates with a mobile app, granting you real-time access to monitor your canopy from anywhere. This app also allows you the ability to access and review lighting data from harvests up to 12 months prior. Welcome to the future of horticultural lighting control, where innovation meets convenience, and your harvests thrive like never before.

INTEGRATED SENSORS & TRACKING:

- PPFD
- Temperature
- Humidity
- CO2
- Data Review & Exports
- Application and tablet will allow users to review current and historical data (12 months)
