GrowPros SOLUTIONS

COMMERCIAL SOLUTIONS DESIGNED SPECIFICALLY FOR INDOOR CULTIVATION

THE ARK - 4' MULTI-TIER ROLLING RACK

STAINLESS STEEL! **THE GAME CHANGER**

GPS-DT-4X8

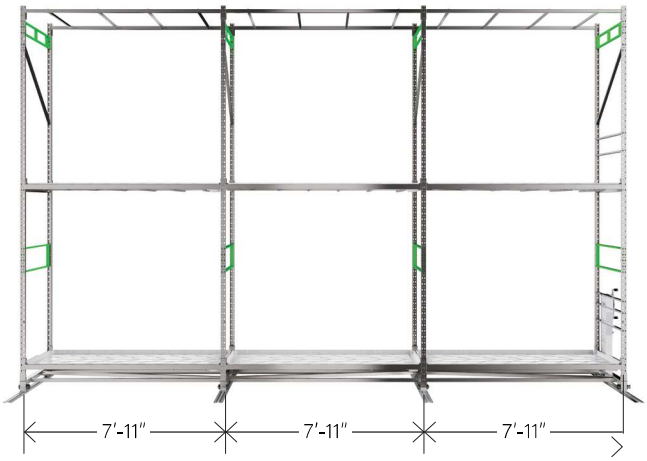

A groundbreaking solution revolutionizing indoor horticulture. Crafted from premium stainless steel, it boasts superior durability, corrosion resistance, and hygiene benefits. Unlocking the vertical dimension of indoor growing spaces, this maximizes plant density and enhances yield per square foot. Its streamlined design ensures easy maneuverability, facilitating efficient workflow management in confined spaces. The space-efficient layout saves valuable floor space, while additional features such as adjustable distance between tiers, durable trays with easy drainage, and optional walkways on upper tiers further enhance its functionality.

INTEDENDED APPLICATIONS

- Green House
- Indoor Cultivation
- Maximizing Canopy Space
- Basement Grows

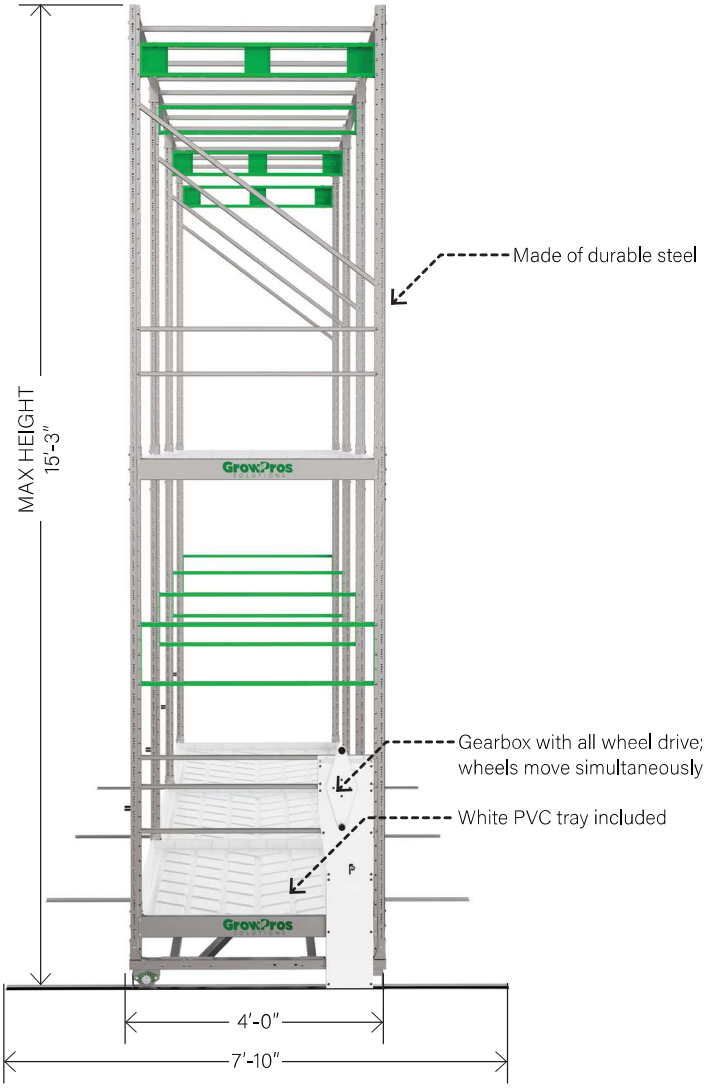

FEATURES & BENEFITS

- Durable Build: Made from high-strength steel for lasting durability.
- Maximized Vertial Space: Adjustable height for tall enviroments.
- Adjustable Tiers: Modify tier heights for different plant sizes and stages.
- Modular: Multi-tiered for efficient and unified movement.
- Smooth Mobility: Tracked wheel system for easy positioning.
- Easy Drainage & Cleaning: Sloped trays allow for quick drainage and easy cleanup.
- Optional Catwalk System: Movable catwalk system for convenient access to upper tier.
- Optional Air Circulation System: Add airflow into each canopy layer to decrease microclimates.
- Extra wide trays for maximum canopy space.
- Custom projects for all types of crops, facilities, and uses.
- Available in Single Tier.
- Earthquake rated tracks available.

STAINLESS STEEL STRUCTURE

- Durable and lightweight; for easy maneuverability and .
- Frame maximizes on vertical space and creates optimal light exposure.
- Each section is boxed individually for easy assembly.
