

# Hype®-D

## (0-0-4) FOLIAR NUTRITION *for Dicamba-Tolerant Crops*

## About Hype®-D

Plants need a "balanced diet" to grow and develop properly. **Hype-D** was developed to be a quick and efficient source of the nutrients needed for productive plants. When applied with a herbicide, Hype-D will help minimize the effect herbicides can have on the immobilization of nutrients within the plant. Incite™ Plant Growth Regulator is an excellent partner product with Hype-D to maximize yield potential.

## Hype-D Formulation

**NPK, Krystal Klear® Ca, Mg, B, Cu, Fe, Mn and Zn**

Adequate, balanced nutrition is important for plant development and enhanced plant health. Micronutrients help build up the plants natural immune system to keep early season diseases at a minimum. Our micronutrients are chelated with IDS and EDTA for superior performance. This dual-chelation technology results in better uptake with much lower rates than competitive products.

**KaPre® PhoNix**

Contains organic compounds that help reduce the effects of environmental stress as well as optimize yield.

**Prudent® K28**

Formulated with potassium phosphite that is quickly absorbed by plants. It is extremely mobile within the plant and will complement systemic acquired resistance and contribute to overall plant health.

**Sugar**

An additional carbon source for energy that is immediately available to the plant. Also helps reduce burn on plant tissues from fertilizers.

### GUARANTEED ANALYSIS

| | |
|---|---|
| Available Phosphate ($P_2O_5$) | 4.0% |
| Soluble Potash ($K_2O$) | 4.0% |
| Calcium (Ca) | 0.03% |
| 0.03% Chelated Calcium (Ca) | |
| Magnesium (Mg) | 0.03% |
| 0.03% Chelated Magnesium (Mg) | |
| Boron (B) | 0.06% |

| 0.06% Chelated Zinc (Zn) | |

**Derived from:** monopotassium phosphate, calcium EDTA, boric acid, copper EDTA, iron EDTA, magnesium EDTA, manganese EDTA, zinc EDTA, potassium hydroxide and potassium phosphite.

## Benefits of Hype-D

- Will reduce and minimize the "yellow flash" from an herbicide application.
- Results will be visual within 48 hours of application on soybeans affected by low Manganese.

## Application Instructions

Hype-D may be applied to all types of crops including but not limited to: corn, soybeans, wheat, and cotton as a foliar application at a rate of .5 to 1 gallon per acre. Applications may be made at crop emergence and every 10 to 14 days throughout the growing season, as needed. Use sufficient carrier to adequately cover crop foliage.

**Caution:** Plant and leaf injury may occur on some crops when certain weather and growing conditions are present.

**Hype-D is recommended as a supplement to a well balanced fertilizer program.**

**Hype-D is a companion product for Engenia.®**
