EASY-TO-USE GARDENING INSTRUCTIONS:
We recommend wearing gardening gloves and washing hands when using this or other planting materials.

GROWING PLANTS FROM CUTTINGS:

1. Fill container with Mother Earth Perlite
2. Water thoroughly
3. Make planting holes with a pencil
4. Insert cuttings into planting holes, placing perlite around them
5. Keep moist and out of direct sunlight

If used for seedlings, feeding should start as soon as the seeds germinate.
If used for cuttings, feeding should start once roots appear.

LIGHTING:
Plants vary in their lighting requirements.
Refer to plant tags for specific light or shade needs.

WATERING:
Let mix dry to the touch between waterings. Do not allow plants to sit in drainage water. Outdoor container plants require frequent watering—as often as once per day in heat, especially under dry conditions.

REPOTTING:
To avoid compaction and to replenish nutrients, all container plants should be repotted annually.

INGREDIENT: Perlite
