OASIS® SOAX®

Liquid Wetting Agent

Optimizes Water Management and Accelerates Wetting of New Substrate Mixes

OASIS® SOAX® Liquid Wetting Agent is a non-ionic surfactant that helps maximize irrigation efficiency and optimize initial wetting and rewetting of growing media. OASIS® SOAX® Liquid Wetting Agent helps ensure greenhouse and nursery crops stay well hydrated from propagation through retail.

Active Ingredient: Polyethylene-polypropylene glycol copolymer
Guaranteed Analysis: 100% Active Ingredient

Net Content: 3.785 Liters (1 Gallon)
Density: 1.04 kg/L (8.67 lbs/gallon)

OASIS® GROWER SOLUTIONS

PROPAGATING INNOVATION.

OASIS® SOAX® Liquid Wetting Agent Usage Instructions/Application Rates

Designed to optimize initial wetting and rewetting of growing media, OASIS® SOAX® Liquid Wetting Agent can be incorporated into growing media prior to filling containers or used as a drench application after container filling, during production or prior to shipping of trays, containers and hanging baskets.

INCORPORATION RATES

Spray and mix into growing media prior to filling containers or bagging.

Media Type	Incorporation Rate*	
	Fluid ounces in 2 gallons of water per cubic yard	Milliliters in 10 liters of water per 1,000 liters of media
Nursery Containers	5.2 fl oz	200 mL
Bedding Plants and Greenhouse	3.2 fl oz	125 mL
Seedling and Propagation	1.8 fl oz	75 mL

DRENCH RATES

Use as a one-time application after filling, during production or before shipping.

Media Type	Concentration	Drench Rate*	
		Fluid ounces per 100 gal of water	Liters per 1,000 liters of water
Nursery Containers	1,500 ppm	19.2 fl oz	1.5 L
Bedding Plants and Greenhouse	1,000 ppm	12.8 fl oz	1.0 L
Seedling and Propagation	500 ppm	6.4 fl oz	0.5 L
Pre-Shipping (Trays, Containers and Hanging Baskets)	500 ppm	6.4 fl oz	0.5 L

CROP MAINTENANCE RATES

Use for ongoing programs for growing media with wetting agent.

Application Frequency	Concentration	Maintenance Rate*	
		Fluid ounces per 100 gal of water	Milliliters per 1,000 liters of water
Constant Feed Program	10 ppm	0.12 fl oz	10 mL
Weekly Maintenance Program	100 ppm	1.3 fl oz	100 mL

* Increasing water volume during incorporation, drenching or crop maintenance will promote wetting agent activation.

MIXING INSTRUCTIONS

Mix OASIS® SOAX® Liquid Wetting Agent with water prior to incorporation, drenching or maintenance. To maximize solubility, add to cool water (60°F, 15°C - 72°F, 22°C, not to exceed 90°F, 32°C). Stir or agitate solution while pouring to obtain desired concentration. For complete usage instructions, refer to Product Usage documents.

SAFETY PRECAUTIONS/HAZARDS

This material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200) and has no known significant effects or critical hazards for eye contact, inhalation, skin contact or ingestion. For safe handling, use in a well-ventilated area and wear protective eyewear and clothing. Wash skin and clothing thoroughly with water after exposure. If eye exposure occurs, wash copiously with water for several minutes and seek medical attention if necessary. For inhalation, get medical attention if symptoms occur.

STORAGE AND DISPOSAL

► Storage: Keep in original container in a cool, dry location out of direct sunlight, above freezing temperatures (32°F, 0°C). Flash Point (424.4°F, 218°C). Stored properly, product shelf life is 2 years from manufacture date.
► Chemical Disposal: For disposal of opened and/or unused product, please check with your local waste disposal facility for appropriate options.
► Container Disposal: After thorough rinsing, used containers may be offered for recycling or reconditioning or disposed of according to approved national and local regulations. Do not reuse empty containers.

WARRANTY

Seller warrants that this material conforms to its chemical description and is suited for the purposes stated on the label when used in accordance with directions under normal conditions of use. Seller makes no other expressed or implied warranty.
