PermaCore
Poly-Iso Panels from PermaTherm

PermaCore Info Sheet

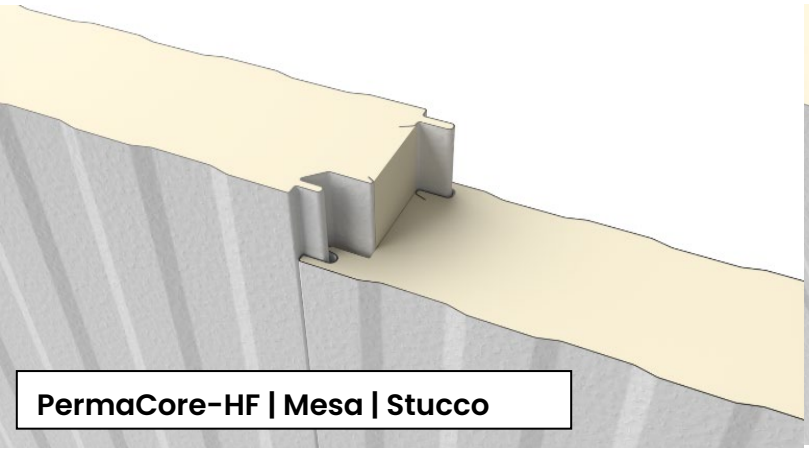

PermaTherm's **PermaCore** product line provides the maximum R-value per inch. Utilizing Poly-Iso Technology (Foamed in Place), **PermaCore** panels meet the highest EPA standards. With **PermaCore,** we currently provide the following panel-joint options:

- **PermaCore-HF** – The hidden fastener joint for a variety of uses including exterior walls.
- **PermaCore-CS** – The cold storage joint which virtually eliminates air entry/loss and thermal bridging.

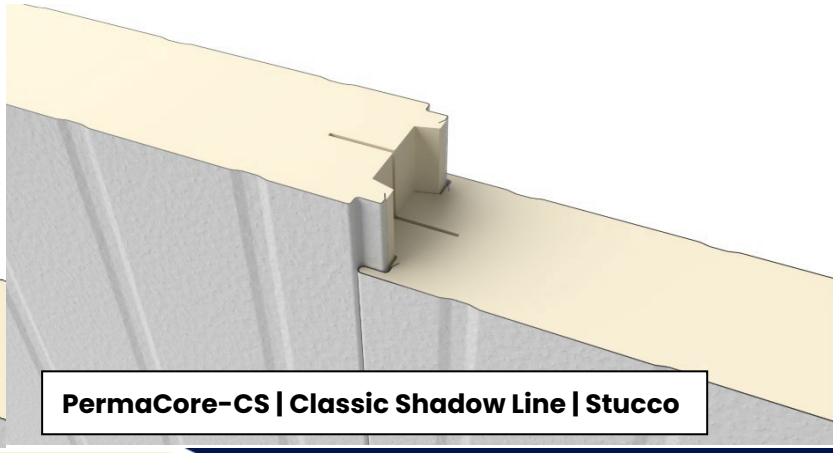

PermaShield
Factory-Notching Technology

Only PermaCore** delivers factory direct ***notched freezer panels. The ultimate way to prevent thermal bridging and save you countless hours of field cutting!

PermaCore panels can be used across any application from food processing, to growing environments, clean rooms, and cold storage. PermaTherm's **PermaCore** panel is the standard for insulated wall panels.
