
HUMBOLDT
COUNTY'S OWN
PURPLE MAXX
0-0-3
net wt: 19.85 kg (42 lbs) 18.9 Liters (5 US Gallons)
Purple MAXX
THE NAME says it all
Soil Usage: Use 1 tsp/gallon of water beginning 2-3 weeks before harvest. For some strains, increase to 2-3 tsp/gallon for extreme intensification. Best to continue through flush if you are flushing.
Hydro Usage: Same as soil.
Foliar: For some strains, foliar is more effective and sometimes works quicker. Use 1 tsp/gallon 2-3 times per week. Spray lightly using the finest mist possible making sure not to wet the flowers.
To prevent contamination, store in cool place with cap closed tightly.
SHAKE WELL BEFORE MIXING
F1731
Guaranteed Analysis: 0-0-3
Soluble Potash (K2O): 3%
Derived from: Potassium Hydroxide
Manufactured by:
Emerald Triangle
PO Box 395
Fortuna, CA. 95548
