SIGMA MICROALGAE

Performance Microbe food for Organic Production

Your soil and microbes form the engine driving plant performance. Without fuel, plants suffer. Our proprietary strain of microalgae acts as jet fuel for your soil engine, boosting microbial activity and enhancing soil and plant health. Suitable for a wide range of crops, including turfgrass, it integrates seamlessly with your existing fertilizer program.

Boosted Microbial Activity

Fuels significant increases in beneficial soil microbial populations.

Nutrient Availability

Maximizes the effectiveness of both natural and added nutrients.

Enhanced Soil Structure

Improves aggregation, increasing root penetration and growth.

2.5 Gallon (9.46L)
275 Gallon Totes (1,041L)

SIGMA ORGANIC INPUT MATERIAL

SIGMA AgriScience

Driven by nature.
Backed by science.

SIGMA MICROALGAE

Get more out of each application with this premium microbe food - a proprietary microalgae strain fueling your soil engine.

Proteins (24g/L)

Essential for building and repairing microbial cells, directly influencing their growth and ability to improve soil health.

Lipids (21g/L)

Form structural components of microbial cell membranes, ensuring durability and resilience against environmental stresses.

Carbohydrates (44g/L)

Act as primary energy sources for microbes, fueling their metabolism and enhancing their soil activity.

ACTIVE INGREDIENTS:
10% Microalgae

Protein	24g/L
Lipids	21g/L
Carbohydrates	44g/L
