TUNDRA™

0-7-8

SPECIALTY FERTILIZER

For use on specialty crops, fruits and vegetables

NET WT. 23.3 lbs (10.57 kg)
NET VOLUME 2.5 gal (9.46 L)

PATENT PENDING

Tundra™ is a specialty fertilizer designed for the fruiting and flowering stages of plant growth. Tundra™ should be used as part of a complete crop nutrition program for high-value specialty crops with heavy nutrient requirements.

DIRECTIONS FOR USE

Shake Well! Contents can settle naturally.
Apply Tundra™ one to three times per week in conjunction with a typical fertilization program. Begin using Tundra™ at the onset of the flowering cycle and continue use through the flowering/fruiting stage. Discontinue use 1-2 weeks prior to harvest for best results.

For use indoors or outdoors with hydroponic, soilless, and soil-based media. Tundra™ can be tank-mixed with aqueous nutrient solutions and/or applied directly to plant roots at the recommended rates. Tundra™ is non-phytotoxic and compatible with most microbial inoculants, pesticides, and fungicides when applied at the recommended rates; however, always confirm compatibility with a jar test and apply to a small section of the crop before mixing and applying large volumes.

APPLICATION NOTES

Tundra™ can improve crop growth when used as part of a complete fertilization program. Tundra™ should typically be applied as a root drench beginning at the flowering (reproductive) stage of plant growth. For optimum results, use Tundra™ at least bi-weekly while plants are flowering and/or fruiting.

SAFETY AND HANDLING

In the case of contact with skin or eyes, promptly rinse with water for at least 15 minutes. For detailed handling information, refer to **impellobio.com** or contact **info@impellobio.com**

EXPIRATION DATE

GUARANTEED ANALYSIS

Available Phosphate (P_2O_5).....7%
Soluble Potash (K_2O).....8%

Derived from: Monopotassium Phosphate, Kelp Extract (*Ascophyllum nodosum*) and Potassium Hydroxide

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

0.06% Humic Acid (derived from Leonardite)
0.05% Kelp Extract (*Ascophyllum nodosum*)
(microbe food)

DOSAGE RECOMMENDATIONS

Containers:	**Field:**
Lite: 5mL / gallon	**Lite:** 1 gallon/ acre
Recommend: 10mL / gallon	**Recommend:** 2 gallons / acre
Heavy: 20mL / gallon	**Heavy:** 4 gallons / acre

STORAGE AND SHELF LIFE

Tundra™ should always be stored in a cool, dry location in a sealed container. Exposure to high heat and humidity is not recommended. Tundra™ is shelf-stable for at least 24 months.
